Debbie,

Here are the Round 1 PM10 data summaries and an updated logbook summary for your review.

Debbie,

Here is a proposed formatted data file for your review. It is a workbook containing a sheet of the 5-sec interval which you already have and another sheet formatted for print containing records extracted from the 1st sheet at one minute intervals. Please let me know if this works for you.

Thanks,

Subject: Data Example

Debbie,

This is the PM 10 data with a 24-hr TWA calculated. We'll look into reducing it to 1 min records then formatting it with grid lines, etc. This first set of data didn't download as clean as the PM2.5 data which we are finishing up. I'll send the PM2.5 data in a few minutes and maybe we can discuss final formatting to suit your needs using that data.
